

Setting Up Your Library Account Online!

In Apollo, you can enter and update important account information by logging in to your account.

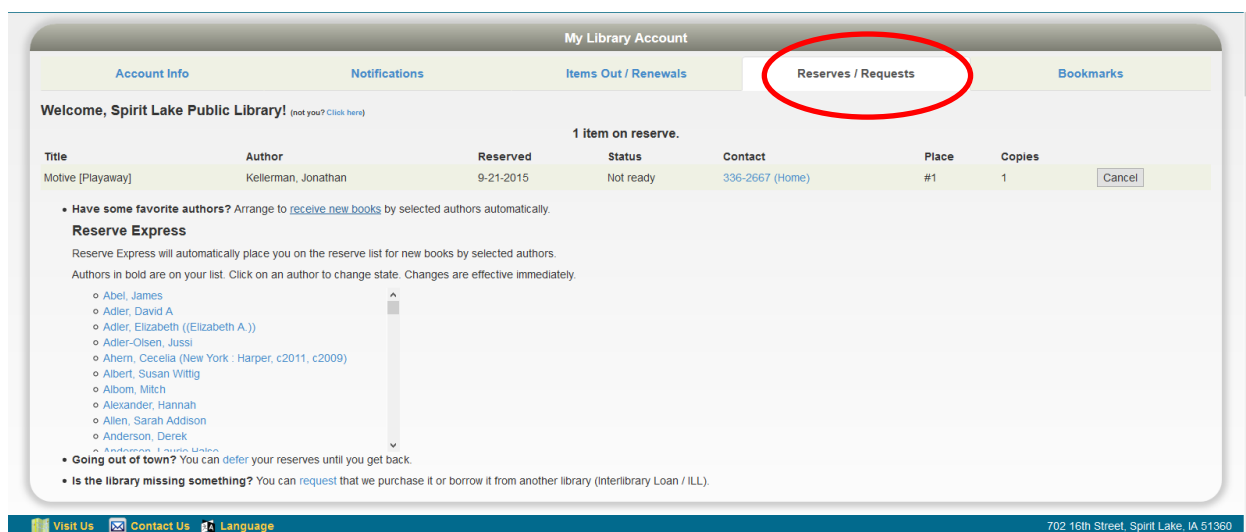

Log in with your complete barcode number the first time. Your pin is your phone number (no dashes).

You can also set your notification preferences.

With Apollo, you will handle your own reserves by choosing your favorite authors. This automatically reserves new titles by your favorite author as soon as they are entered in the system. Click on the name of your favorite authors and you will automatically be signed up for their new titles when entered.

You can also "defer" your account activity when you leave for any length of time by entering the dates.
